

100% MANAGED VDI

Windows and **Linux** VDI and vApp

No need for own **hardware**

Pay-per-use **No initial investment**

Multi-tenant environments

Service hosted and fully **managed** by **certified ISPs**:

- Maintenance
- Updates
- Backups
- Storage
- Processing and networks
- Support

Possibility of including **operating system** licenses

Private cloud, hybrid cloud or **multicloud**

AWS, Microsoft **Azure**, **Nutanix**, VMware **Cloud Director**, **OpenStack**...

ADVANCED CUSTOMIZATION

Fully **customized** workstations

User profiles: access to all the software and apps they need
100% **customizable appearance**. **Open Source** based

Secure access 24x7, from **anywhere**

Connection via web browser with devices of **all ranges**
Improved user experience, no difference to working locally

Maximum **stability**

Low latency. Unbeatable **response times**
Access to **legacy** applications and programs

Collaborative remote working with total **security**

Office (**Office 365**), **videoconferencing**, and call center tools
Huge benefits for organizations in **every sector**

AUTOMATION AND SECURITY

Unprecedented levels of **automation**

Automatic **scheduling** of computer deployment and removal

Dynamic sizing of virtual desktops and applications

Immediate scalability, according to the needs of the moment

Overflow in the **cloud** without expanding own infrastructure

Possibility of **combining** different virtualization **environments**

Centralized management from a single console

Standardized workstations with the latest security patches

Comprehensive security of all connections and devices

Two-factor and **multi-factor authentication** (MFA)

Zero Trust and Least Privilege Policies

Compliance with the **highest security standards**

SUSTAINABILITY AND SAVINGS

Sustainable Development Goals (SDGs) of the 2030 Agenda - UN

Maximum energy **efficiency** and cost **savings**

Reduction in **CO2** emissions

Circular economy: **Reuse** of computers

Lower hardware and electricity **consumption**

Decrease in technological **waste**

Reduction of travel needs: **Remote working**

Green IT. Cutting-edge technology at the service of **the environment**

VDI solutions ready for **5G** adoption

State-of-the-art innovation to improve **resilience**

Promotion of **Corporate Social Responsibility**
